### PA Day Event: Blown Away: The Power of Wind

Date and Time: Friday, April 4 11:00 am - 3:00 pm

Address: 2423 Kelly Rd, Oil Springs, ON N0N 1P0

Catch the breeze and explore the power of wind at the Oil Museum's PA Day event on Friday, April 4 from 11:00 a.m. to 3:00 p.m.

Discover how the powerful winds off Lake Huron are harvested as a renewable energy source. Create your own pinwheel and flying fish kite to see wind power in action. Play with wind-powered robots and learn how wind turbines generate electricity.

Regular [museum admission rates](#) apply.

### One Seed Lambton: Grow Your Garden with Lambton County Library

Date and Time: Thursday, April 10 7:00 pm - 8:00 pm

Address: 2423 Kelly Rd, Oil Springs, ON N0N 1P0

[REGISTER HERE](#)

*Please note the registration link will take you to Lambton County Library's website*

Learn how to cultivate and care for tomato plants for your One Seed Lambton tomato seeds.

Join Community Librarian, Emily Robinson at the Oil Museum of Canada, as she introduces the One Seed Lambton and Seed Library programs offered by [Lambton County Library](#). Participants will enjoy a hands-on activity, planting their tomato seeds in small pots to take home. Discover professional tips from the agricultural community about tomato care, including how adding calcium near the roots can prevent end blossom rot and promote healthier plants.

This workshop provides everything you need to start growing your own delicious tomatoes from seed to harvest.

This workshop will take place at the Oil Museum of Canada, National Historic Site at 2423 Kelly Road, Oil Springs.

## Building the St. Clair Tunnel

Date and Time: Friday, April 11 2:00 pm - 3:00 pm

Address: 220 Michigan Avenue, Point Edward, Ontario, N7V 1E8

### REGISTER HERE

*Please note the registration link will take you to Lambton County Library's website.*

***This program will take place at Point Edward Library.***

Learn about the construction of the St Clair Tunnel!

Rail traffic is backed up and at a standstill on a frozen stormy night in the middle of winter. It is too dangerous for the Grand Trunk Railway ferries to make the river crossing in the storm and tomorrow will be lost due to ice jams. The St. Clair River crossing has become a bottleneck and delays are costing money. The solution is digging a tunnel in the soft clay beneath one of the fastest rivers to join Canada and the United States by a ribbon of steel. This was an engineering marvel of its time only to be repeated 100 years later by employing the latest laser guided technologically advanced tunneling machine dubbed "Excalibore" built in Toronto Ontario.
